

Evgeny Smirnov

Product Leader · Founder · Head of Product

B2B SaaS · Marketplaces · AI-driven products · 0→1 product building

Setubal, Portugal · +351 934 667 366 · evgenys.designer@gmail.com · linkedin.com/in/evgsmir · smirnov.host

Authorized to work in the European Union and Canada. Available immediately.

PROFESSIONAL SUMMARY

- 15+ years building B2B and consumer products end-to-end, from 0→1 inside startups and as a founder. Six full product cycles from concept to shipped product.
- Founder / co-founder of three ventures — **UVAGA** (B2B healthcare market intelligence), **SmirnovForm** (design lab), and **Montessori Spring** (10-edition professional conference, up to 700 participants).
- Built and led cross-functional teams from scratch. Owned product positioning, information architecture, customer discovery, and shipped under extreme ambiguity.
- Bridge between product, design, and engineering — write production HTML / CSS / JS, prototype with LLMs and APIs, and partner with engineering as a peer rather than a handoff.
- Active educator and mentor: lecturer at IT Career Hub (Germany), Senior Mentor on ADPList with 1,260+ minutes of 1:1 sessions worldwide.

FOUNDER VENTURES

UVAGA · Founder*Jan 2026 – Present*

B2B healthcare market intelligence platform · Setubal, Portugal · uvaga.me

- Solo-built from zero: defined product vision, category positioning, information architecture, and core workflows in a new product space.
- Ran customer discovery in parallel with shipping the product — validating demand and iterating positioning against real conversations, not assumptions.
- End-to-end ownership across discovery, design, prototype, implementation (HTML / CSS / JS + LLM-assisted backend), and go-to-market. No team, no delegation.

SmirnovForm · Founder*2025 – Present*

Personal design lab and published work · smirnovform.com

- Self-initiated platform for interaction-design experiments, design-system exploration, and published thinking on product practice.
- Frame for testing patterns and prototypes that feed back into client and founder work.

Montessori Spring · Co-Founder, Head of Product & Design*Jan 2015 – Apr 2025*

Annual professional conference, 10 editions, up to 700 participants · Moscow, Russia · montessori-vesna.ru

- Co-built and ran the full digital and operational stack: ticketing platform, registration, on-site QR scanning, badge printing, payment integration, AV, Wi-Fi, venue and vendor coordination.
- Owned end-to-end every year: product strategy, brand identity, vendor selection and specs, live troubleshooting during the event itself.
- Consistent year-over-year attendee growth ($\approx +20\%$ per edition) with a core operating team of three.
- Outcome: a recurring 700-person event run by a tiny team — the operating system, not just the design, scaled.

PRODUCT EXPERIENCE

Lead Product Designer · Peak AI*Apr – Dec 2025*

Enterprise AI platform for elite sports performance analytics · London, UK (remote)

- Led UX strategy for an AI platform analyzing complex performance data; designed interaction patterns for AI-generated insights, recommendations, and decision flows used by professional clubs.
- Defined how users interpret, validate, and act on AI outputs — explainability, confidence cues, human-in-the-loop overrides.

- Worked in a continuous discovery loop with PMs and engineers, translating ambiguous business hypotheses into validated user flows and shipped prototypes.

Head of Product Design · GetLatka*Oct 2023 – Apr 2025*

SaaS market intelligence for B2B SaaS investors, founders, and operators · Los Angeles, USA (remote)

- Led product design for an ARR, growth-metrics, and competitive-benchmarking platform serving B2B SaaS investors and operators.
- Designed AI-driven features (intelligent search, summarization, insight generation) — shaped how users query and act on structured and unstructured company data.
- Ran usability research and iterated platform UX from quantitative and qualitative signals; also owned design and layout of the quarterly printed magazine.

Lead Product Designer · Loja Studio*Mar – Oct 2023*

Decarbonization marketplace (SaaS) built from scratch · Setubal, Portugal

- Built a brand-new product category end-to-end with the founder: vision, positioning, information architecture, prototypes, complete UI.
- Translated a niche enterprise domain (carbon credits, decarbonization vendors) into approachable flows for early users.
- Pushed back on the founder's plan to skip the admin panel for the investor pitch; built it anyway. It became part of what he demoed.

Head of Design Department · Tetrika*Jun 2021 – Feb 2022*

EdTech platform with individual and group online lessons · Moscow, Russia

- Established the design department from scratch in an Agile environment: hiring, sprint planning, backlog grooming, mentoring, design reviews.
- Led platform-wide redesign of personal account flows; built design system and UI kit with front-end and back-end teams.
- Combined disparate designers across product, marketing, and sales into a single weekly cadence — instilled discussions of current tasks, concepts, and ideas across the team.

Product UX/UI Designer · CMW Lab*Oct 2011 – Jun 2022*

Enterprise B2B low-code platform (CRM / ERP / BPM / HRM) · Moscow, Russia

- Joined at startup stage. Scaled with the company into a global enterprise vendor — "did everything" early on: competitor analysis, prototyping, icons, banners, layouts.
- Collaborated with PMs on requirements; owned use-case definition, prototyping, and defending design decisions with leadership.
- Built cross-browser HTML / CSS layouts with complex CSS, SVG, and JS animations; contributed to the company's design language and core UI kits.

TEACHING, MENTORSHIP & COMMUNITY

- **Lecturer**, [IT Career Hub](#) (Germany) — UX / Product Design course for designers transitioning into product roles.
- **Senior Mentor**, [ADPList](#) — 1,260+ minutes of 1:1 mentoring with mid- and senior-level designers worldwide.

EDUCATION & CERTIFICATIONS

- Bachelor of Science, State University, Russia.
- An Introduction to Accessibility and Inclusive Design — Coursera (University of Illinois at Urbana-Champaign).
